

DTL Data TestLab Award 2007

The SecPoint Protector beats 7 competitors: BorderWare, F-Secure, IronPort, NetASQ, SonicWall, Symantec and Trend Micro.

WINNER MAIL SECURITY APPLIANCE

PERFORMANCE:

"This spam filter works surprisingly well. We found no false positives and only one spam message every four days per mailbox. That is the best score of all and so even surpasses the performance of IronPort and NetASQ."

CONCLUSION:

"Mailfilterappliances are clearly becoming better. Most of the tested appliances are good at stopping spam and the avoidance of false positives. The best performer is the SecPoint Protector"
