

Portable Penetrator

Recover WEP WPS WPA & WPA2 Keys
Easily Secure Your Own Wifi
User Friendly Interface
Vulnerability Scanning

"Whether you're a security professional or a novice, Portable Penetrator PP4000 is a device which is a complete solution for auditing and improving the level of security of wireless networks. Thanks to built-in report module you will have all the documentation of the security audits you have conducted. The product has a great value for a great value for a complete solution like Portable Penetrator PP3000."

Both 2.4 GHz and 5.8 GHz Wifi Ranges Supported

PREVENT HACKERS FROM ENTERING YOUR WIFI NETWORK!

Portable penetration testing and wireless auditing

The Portable Penetrator combines the latest hacking and cracking tools that offers the most comprehensive penetration testing kit.

Wireless Auditing

The Portable Penetrator allows you to do real wireless WEP, WPA and WPA2 auditing. Just like an attacker would do it! It highlights any weaknesses in wireless networks and shows how these can be secured most effectively.

55,000+ Database Signatures

The Penetrator vulnerability database consists of more than 13 years of research. The database has a total of more than 55,000+ unique remote vulnerabilities to test for. This database is updated multiple times daily.

Launch Real Exploits and Denial of Service Attacks

You can launch real exploits to verify that an identified vulnerability is exploitable. It is also possible to launch real Denial of Service attacks to test preproduction systems for stability.

Reports Branding

Branding and personalisation of the reports and selling them as a service is allowed.

System or Network Device

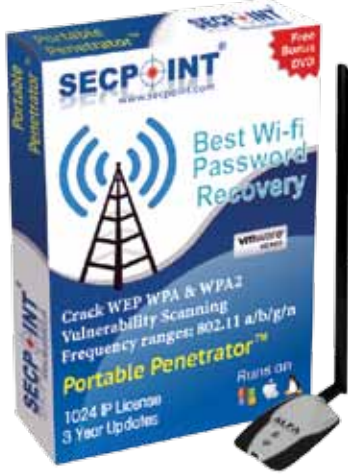

The Portable Penetrator is designed to audit any operating system or network device. It is beneficial to audit devices in the network setup to find and rectify any vulnerabilities identified before an attacker can exploit the vulnerabilities.

Detailed Remedies for Identified Vulnerabilities

The Portable Penetrator comes with detailed remedies for identified vulnerabilities. This allows the user to quickly fix the identified vulnerabilities.

Automatic Database and Firmware Updates

The Portable Penetrator will automatically download updates multiple times daily, at the users discretion, to ensure the vulnerability database is as updated as possible.

Features and Benefits

- Wireless, WEP, WPA and WPA2 auditing
- Launch Real Exploits and Denial of Service Attacks
- Automatic Database and Firmware Updates
- Vulnerability Assessment
- 55.000+ Database Signatures
- Reports Branding
- Security Audit any Operating System and Network Device
- Detailed Remedies for Identified Vulnerabilities
- Latest Auditing Tools Included
- Wireless Security Assessment Tool

Prevent Hackers from entering your Wifi Network!
